

TECHNICAL DATA SHEET

CASTLE CORROSION OFF Battery Cleaner

DESCRIPTION: Corrosion Off cleans batteries and detects leaks in one easy operation. Corrosion is dissolved while Corrosion Off detects the location of acid leaks by turning a bright red. A reapplication will show if the acid has been totally removed. This detection feature is a valuable aid in locating cracks and leaks in batteries. Maintaining battery connections can extend the life of your battery while preventing no-start conditions. After cleaning, coat battery with Castle Long Life.

USES: *Cars *Marine *Fleet *Aircraft *Tractors *Lawn Equipment
*Golf Carts

DIRECTIONS:

1. Spray all areas of the battery and allow to stand.
2. Flush with water. Avoid splashing onto painted surfaces.
3. Reapply to determine if all corrosion has been removed.
4. Repeat until no red appears.
5. Coat connections with Castle Long Life.

PACKAGING: 16 oz aerosol 12/case

STORAGE: Keep from freezing.

SPECIFICATIONS:

Color	yellow
Specific Gravity	0.9
Flash Point	-40°F
Odor	solvent
Freeze Stable	yes
Corrosive to Steel/Aluminum	none

PRODUCT #: C1614

DATE REVISED: 09/29/98
