

## TECHNICAL DATA SHEET

### JET KIT Fuel Injector Cleaner

**DESCRIPTION:** Jet Kit is the professional way to clean port and throttle body fuel injector while still on the car. Using the adapter kit, Jet Kit hooks up to the cars fuel system and the car runs directly off the pressurized canister. The solvents in the Jet Kit liquefy harmful combustion proces. This formula is so potent, it must be used directly into the engine. Certain material in the gas tank could not withstand impact of such powerful cleaner. After the cleaning is complete, pour Castle Fireball Injector Cleaner into the tank to complete the Ultimate Tune Up.

**USES:** Any gasoline engine with fuel injector.

**DIRECTIONS:** Since entry to fuel system differs from car to car, see the separate instruction manuals.

**PACKAGING:** 13.5 oz canister            12/case  
16oz    12/case

**STORAGE:** Do not expose to heat or store at temperatures above 120°F.

**SPECIFICATIONS:**

Color	amber	Specific Gravity	.87
Flash Point	42°F	Cleaning	N/A
Odor	solvent	Effect on Paint	keep off
Density	4.0	Freeze Stable	yes

**PRODUCT #:** C2013  
C1636

**DATE REVISED:** 10/13/98
