FUEL SENDING UNIT REPAIR LINES

- repair rusted and leaking sending unit/fuel pump steel lines
- all repair lines are original equipment style with 90 degree bend
- 90 degree end has been reduced in diameter and is easily soldered or cold welded (JB Weld) into base of old line
- no special tools are required to install new lines, simply cut off old rusted line flush with top plate of sending unit and solder or cold weld (JB Weld) new repair line in
